Table of contents

1 A prospective pathway for meeting mathematics education challenges 19
1.1 Mathematical knowledge 19
1.2 Theoretical framework 21
1.3 Problem statement 24
1.4 Research focus 27
1.5 Summary: A prospective pathway 34

2 Threshold concepts in the unfolding number systems 35
2.1 From intuitive notions into explicit knowledge 35
2.2 Epistemological context 37
2.3 Unfolding number systems 38
2.4 Summary: Central factors in mathematical development 44

3 Theory of conceptual fields: Essential domains informing teaching and learning 46
3.1 Embracing the complexity in learning mathematics 46
3.2 Conceptual domain 49
3.3 Cognitive domain 52
3.4 Didactic domain 58
3.5 Semiotic domain 59
3.6 Evaluative domain 61
3.7 Summary: Consequences for educational research and measurement ... 62

4 Assessment and measurement: A discussion of core requirements 65
4.1 From mathematics to measurement 65
4.2 A theory of mathematics assessment 68
4.3 Measurement and the Rasch model 72
4.4 Validity of assessment practices 83

5 The multiplicative conceptual field 85
5.1 Mathematical structure and developmental consequences 85
5.2 Multiplication and division 87
5.3 Rational number 97
5.4 Percent 110
5.5 Probability 117
5.6 Proficiency in the multiplicative conceptual field 118
5.7 Summary: Didactic implications, assessment and research 120

6 Exploration of data within the Rasch measurement framework 122
6.1 Understanding complexity through application of the Rasch model.... 122
6.2 Methodology for the empirical investigation..... 122
6.3 Analytic framework for item analysis..... 135
6.4 Item analysis 140
6.5 Fraction item analysis 143
6.6 Ratio, proportion and rate item analysis 148
6.7 Percent item analysis..... 153
6.8 Probability item analysis..... 157
6.9 Pre-Algebra item analysis 161
6.10 Summary descriptions at Levels 1 to 7 165

7 Identifying threshold concepts in reasoning behind item responses 172
7.1 Tracking learner competences 172
7.2 Research method..... 173
7.3 Framework for interview analyses..... 177
7.4 High proficiency learners..... 182
7.5 Middle-high proficiency 196
7.6 Middle-low proficiency 206
7.7 Low proficiency 216
7.8 Overview of four proficiency levels 219
7.9 Theoretical insights from the theory of conceptual fields 221
7.10 Recommendations for the instrument..... 222
7.11 Reflections on the interviews..... 223

8 Addressing complexity: Implications for curriculum, teaching and assessment..... 224
8.1 Answering Poincaré 224
8.2 Insights from the theory of conceptual fields 224
8.3 Insights from the perspective of assessment and measurement..... 225
8.4 Implications for curriculum, teaching and research..... 227
8.5 Reflections and limitations 232
8.6 Future Research 235
8.7 Conclusion 236

9 References 238

List of Abbreviations..... 245
List of Figures 246
List of Tables..... 247
